NEVE 1651.

Mercurius Annalis.

OR,

A New Almanack and Prognostication, serving for the yeare of our Lord God and Saviour Jesus Christ. 1651.

Being the third after the Bissextile, or Leap-yeare.

Wherein is contained a double Kalender, viz. the *Julian* or English Accompt, and the *Gregorian* and Forraigne Computation, with the Change of the Moone, her Full and Quarters: and other necessary observations, convenient to be noted.

Calculated, and exactly rectified, for the Elevation of the Pole Arricke, and Meridian of the ancient and famous City of *Norwich*, and may serve generally for the most part of great BRITAINE.

Practised, penned, and published, by JOHN NEVE, Gent.

LONDON,
Printed by *S. I.* for the Company of STATIONERS.

The Contents of this double Kalender for this year of our Lord God 1651. being the third after the Bissextile or Leap-yeare, according to the accompt or computation of the Church of *England*.

NEVE. 1651

A PROGNOSTICATION,

Serving for the yeare of our Lord God and Saviour JESUS CHRIST.

1651.

Wherein you may observe the grounds of the alteration and condition of the foure Quarters of this yeare: As also the disposition of the Aire, for each severall Month, according to the inclination of the Celestiall bodies, with the change of the Moone, her full, and Quarters, and the use of the Eclipses, with other things fit to bee knowne and observed.

Calculated, and especially referred to the Longitude and Elevation of the Pole Artick, of the ancient and famous City of *Norwich*, and may serve generally for all *England*.

Collected, and Published, By JOHN NEVE, Gent.

Printed at *London* by *W. Wilson* for the Company of *Stationers*. 1651.

A Briefe and necessary Rule, for the beginning and ending of the foure Termes, with their Returnes.

Hilarie Terme begins Jan. 23. and endeth Feb. 12. and hath foure Returnes.

Octab. Hilar. Jan. 30.	Crast. Purif. Feb. 2.
Quind. Hilar. Jan. 27.	Octab. Purif. Feb. 10.

Easter Terme begins 17 dayes after Easter, and ends the munday after Ascention day, and hath five Returnes.

Quind. Paich. April. 14.	Quind. Paich. May 1.
Tres Paich. April. 17.	Crast. Ascen. May 9.
Octab. Paich. April. 28.	

Trinity Terme begins the fryday after Trinity Sunday, and ends the wednesday fortnight after, and hath foure returnes.

Crast. Trin. May 26.	Quind. Trin. June 9.
Octab. Trin. June 2.	Tres Trin. June 16.

Michaelmas Terme begins 23. October, and endeth 28. November, and hath five Returnes.

Tres Mich. Octob. 30.	Crast. Mart. Novem. 8.
Menic Mich. Octob. 27.	Octab. Mart. Novem. 4.
Crast. Anim. Novem. 3.	Quind. Mart. Novem. 11.

Note that the Exchequer openeth eight dates before any Terme begins, except Trinity Terme, in which it openeth onely foure dayes before.

On these dayes following the Judges sit not at Westminster.

In { Hillarie / Easter / Trinity / Michael. } Terme, on { Candlemas / Ascention / Midsummer / Alholland } Day.

Some

Some briefe generall Rules for Husbandry and Gardening.

The best time to sowe all kinde of Corne, is when the Moone goeth her course in Cancer, or Pisces.

The best time to plant and graft, is in the increase of the Moone then being in Taurus, Virgo or Capricornus.

Remove and set young trees from October till February, in the first quarter of the Moone, then being in Taurus or Capricornus.

Crop your trees and set sowe, that the sappe may not follow and flower greene againe, when the Moone is in the full quarter.

Fell timber in December and Ianuary in the ebb of the Moone is best; that if any sprouts happe to grow again, cut it before in the wane of the Moone.

The best time to cut Withes is in the end of Ianuary, in February and in the beginning of March, the Moone standing in Taurus, Virgo or Capricornus.

The best season between the change and full, from the end of Ianuary, till the beginning of June.

Set and sowe all kinde of seed, the Moone being in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But the three latter seem best to be found, and to follow three or foure dayes before or after the full moone.

Gather all manner of fruits, neere the full Moone, in dry time, gather flowers and seeds for Bees; at the full of the Moone.

Geld carefully the moone being in Aries, Sagittarius, Capricornus: Shears sheep, cut hayes that it may the faster grow againe: the Moone increasing, that is from the change to the full.

To mucke your land that seeded may not abound, best in the last quarter of the Moone.

A fit time to kill fat Swine is in the increase, night

the full Moone, the lord the latter will subuert the bopling.

Destroy Fowles, Beasts, and Cozns, &c. in the last quarter of the Moone.

Of all the Eclipses which shall happen this present yeare of our Lord God 1651. according to the Exposition of Tycho Brahe.

There shall be presented unto the eyes of the inhabitants of this our Terrestriall Globe, three Eclipses of the Sunne, whereof not any of them shall be seene in this our Horizon, neither any Eclipse of the Moone, this yeare shall be seene in the whole compasse of the Earth.

Of the first Eclipse of the Sunne.

Upon the 19 of April in the Gregorian yeare, but in our Julian or English yeare, on the 9 of April, the Sunne shall suffer a great Eclipse, which shall appeare about midnight, unto the people of California in Mexica, and in the occidentall Ocean in certaine Ilands named Los Monges, la Vezina, la Desgraciada neere unto the Tropicke of Cancer, and also in de los Tubernos, beyound the Equinoctiall line. The true motion of the Luminaries, shall bee neere Caput Draconis, about 29 degrees of Aries, in a signe of the Orientall, and fiery Triplicity, hot and dry, Masculine, Diurnall, Movable, the house of Mars, the exaltation of the Sunne, and the fall of Saturne. This Eclipse shall happen below our Horizon, and so cannot appeare unto us, but onely towards our Antipodes, being remoued from our Meridian, 10 houres and 47 min. in the Longitude of 234 degrees, and 45 min. and in 12 degrees of South Latitude. The digits or degrees Eclipsed, will be 12. The time of Incidency shall be one houre and 45 min. The

totall observation from the beginning unto the ending, unto those Countries in the Longitude before specified, shall be 3 houres and 30 minutes.

Of the Second and latter Eclipse of the Sunne.

THe latter Eclipse of the Sun, shall sensibly and visibly appeare, on the 14. of October, in Asian parts, but according to our computation, upon the fourth of the same moneth, about two of the clocke in the afternoone, in severall parts of Africa, in Brasile, and the South part of America, in Peruviana, upon the Sea coasts, & in certaine adjacent Islands. The Sunne and the Moone being both conjoined neere Cauda Draconis, in the 20 degree and 31 min. of Libra in a signe of the occidentall Triplicity, hot and moyst &c. The Eclipse is from our Meridian removed towards the west almost 2. houres and 52 minutes, in 253 degrees of Longitude, and in 2 degrees and a halfe of South Latitude. The digits eclipsed, will be 7 and 29 minutes. The whole digits continuance from the beginning to the end, in the Longitude and Latitude aforesaid, shall be three houres and 20 minutes.

The great coniunctions of great Starrs,
The Eclipse of Sun and Moone:
Doth threat great Death, great Dearth and warr,
If we repent not Soone.
Now God above, and wrath above,
And Heaven above relent;
And man beneath, and sinne beneath,
And Earth beneath, Repent.

Briefe

Briefe Rules and necessary Observations concerning Bleeding, Bathing, Purging, and sweating, according to the motions of the Moone.

Of Bleeding.

When the weather is extreame hot or cold, it is not then convenient, either to let blood or to purge, unlesse some great necessity do require it: yet necessity standing, if this blood-letting be for the obtaining of Apoplexie, for a continuall head-ache, ouerflowing of choller or blood, or any hot-burning Feuer, or other extreame paine, a man in such a case may not stay for a chosen time, because the patient might miscary in the mean season: but in this aforesaid case of extremitie, blood is not to be let in such a quantity, as otherwise it would, if a chosen time might conueniently be expected.

The best time to let the Phlegmatick blood is when the moon is in Aries or Sagitarius, the head and thighes excepted. For the Melancholy, the moon being in Libra or Aquarius, the buttocks and legs excepted.

For the Choleriek, the moon being in Cancer, Scorpio, or Pisces, the breast and feet excepted.

For the Sanguine, al be good which before is named.

In Spring time let blood at the right ſide.

In Harvest time let blood on the left ſide.

Of Bathing.

BAthings are commonly vſed rather for pleaſure then for profit, ſpecially where hot houſes are not much haunted: but I intend not to ſpeake of them otherwiſe then to adverriſe thoſe that tender their owne health to be wary and circumſpect, in reſorting vnto them, without cauſe, and immediately after

...ther of with such persons as be sanctified. Remove, that is not good to bathe, the Moon being in earthly signes, as in Taurus, Virgo, or Capricornus, that causes to sweat, they are of a cold nature, and the nature of salt is to refrigerate and bind; and in the Moons being in their signes, the pores of the body are shut and bind; so that there can be no reduction of humours and superfluities subject for bathing, hoppe to see a= voyded. But in fiery signes, as when the Moon is in Aries, Leo, or Sagittarius, then it is a good time for bathing, for then the hoop is apt to reduction; for it is the nature of heat to open and resolve.

It is best bathing two or three dayes after the change, and at the full of the moone, for then the su= perfluities are ripe and ready to be avoided, and dis= posed to flow and move out. Whichmoued is the true and end use of bathing.

Venus will enter into the Bath for cleanneſſe sake, if the moon be in Libra or Pisces.

Furthermore, if bathing be used for health, let the party grieved learne of the skilfull Physitian, whether his sickness hath need of mollifying or drying, for if it require mollifying, as in Phthisis, and such like, then let him bath in watry signes, having good aspects with Iupiter or Venus. But if the sickness require dry= ing, as in Paralysis, and the like, then let him bath, the Moone being in fiery signes, having good aspects with Mars and the Sunne.

Also before you enter into any bath, your body must be first prepared & purged, for if you go in unprepared peradventure you may be worse than before.

The best time of the year to bath in is in the Spring, and Harvest, and in the monthes of May and September.

The best time of the day to go into the bath is one hours after the Sunne-rising at the least, always provi= ded

ped, that you smith either an houre, or halfe an houre before, and bathe a while either by nature or art, you must cover your head well, so long as you be in the bath, and beware you drink not cold drinke, although you be very thirsty, but forbeare all things that be cold. And when you are hot within, cold in the outward parts some principall member and hurt you.

The time of tarrying in the bath is commonly two houres, but it may be more or lesse, according to the nature of the bath, or leanes of the party, as the discretion of the leech shall direct.

For Purging

In purging these five things ought to be knowne.

1. The humour which abounds.
2. The best way to stoppe it.
3. The strength of the person.
4. The manner of the disease.
5. The true nature of the medicine.

For when these things are not considered and observed, many perilous accidents may follow, & greatly hurt the body.

Good signes for purging generally are Cancer, Scorpio, and Pisces, particularly with potions of vomit, the moon being in Scorpio.

Purge with Electuaries, the moon being in Cancer.

Purge with Pilles the moon being in Pisces.

Take preparatives, the moon being in Gemini, Libra, or Aquarius.

Take vomits, the moon being in Aries, Cancer, or Capricornus.

Take Clisters, the moon being in Libra, or Scorpio.

To provoke Vrine, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the moon being in Taurus, Virgo, or Capricorne.

God

God to comfort the vertue Attractive, the moon be-
ing in Aries, Leo, or Sagittarius.

God to comfort the vertue digestive, the moon being
in Gemini, Libra, or Aquarius.

God to comfort the vertue Retentive, the moon be-
ing in Taurus, Virgo, or Capricornus.

God to comfort the vertue expulsive, the moon be-
ing in Cancer, Scorpio, or Pisces.

For using of Ointments or Plaisters, they are best
to be applyed and used, when the moon is in that signe
which governeth the same member or part of the body
to which it is applyable.

For Sweatings.

Sweatings, as they are of two sorts, that is to say
Naturall and Artificiall, so they are used for two
ends and purposes: the naturall sweate, if good heed
be taken in opening of the pores will dissolve grosse
and fleshy humours, will cleanse the blood, will cons-
sume the Feuers, will put away cold, will consume raw
humours, will quallifie and quench raging Feuers, will
help wearinesse and the dropsie.

The Artificiall sweat will cleanse scabs, put away
itch, amend vulnesse in hearing, ease the stone, resolve
congealed and cold melancholy blood & humours.

But for the better performing and effectuall work-
ing in these cases, the counsell of the learned Phy-
sitian; is to be desired and used.

The best and meetest signes to sweat in, are Leo,
Aries, and Sagittarius, and that two or three dayes af-
ter the change, and at the full of the moon.

And note that sweating is better to be done in the
evening then in the morning: for when the body hath
nourishment within, the spirits shall not be drawne
forth to the extreame parts.

Note

Note further, that leane folke and lyte of bodie persons, must sweat little by it selfe, yet it will yeare much: but fat folkes may sweat well and it will do them much good.

A Briefe Description of the foure Quarters of this present yeare of our Lord God. 1551.

Of Winter.

WInter, (which is the chiefest season for the Husbandman, the disgrace of Summer, and the very debaucher of the fruitfull harvest) begun to take his effects according to our usuall computation on the 12. of December in the yeare aforegoing, at the first entrance of the Sun, into the first minute of the Signe Capricornus, at which time the Sun shall be at his greatest southy declination, from the Equinoctiall line, (to that he visiteth South-east, and South-west.

Now is the Hyemall or Winter Solstice, for the Sun is so far removed from our Zenith, or perticular point, that he cannot declyne any further, and therefore stayeth there, and then is the shortest day and longest night in the yeare, and so this Quarter doth continue, untill the 11. of March next following.

This season is by nature cold and moyst, unpleasant for the most part to travellers, either by sea or land, unto aged persons, it is very contrary, engendring superfluity of rawnesse, and abundance of cold moysture, to vex them with sundry sorts of sicknesses, to their great troubles and disquietnesse.

The diseases and casualties of this Quarter, are these and such like, Rhumes, Poses, Coughes, quotidian Fevers, Gouts, Palsies, sore eyes, Tooth-ach, Tathers, Fluxes, Cramps, Sciatica, Windinesse,

Collision, Falling Dentils, Eclo-

This will the starres if God affent,
Which power alone can all prevent.

Of the Spring.

The Sun (which is the eye of the World) the fountain of light, and the chiefe moderator of all the reſt of the lights,) hath like a Giant run his race, and finiſhed his revolution (Gradatim) throughout the 12. ſignes, and he this [illegible] of March beginneth his journey afreſh again, and goeth an East courſe, and to [illegible] an equality betweene the day and night, and indeed are equalled throughout his whole progreſſe, to the great joy and comfort of all his creatures, cheering daily his ſplendent countenance the more towards South of this our habitable of mortality, (which the darkned countenances of winters croſſeneſſe, had almoſt ſubdued) with more chearfull preſence, wherever the earth begins to ſmile, and to put on her new apparell, the flouriſhing livery of the Flora.

This ſeaſon is by nature hot and moiſt, the moſt temperate time of the yeare, and the leaſt diſeaſe of ſickneſſe that hath poſſeſſion heere; and a very convenient time for the removing of ill cauſes & griefs gotten before, whether ſhould and paſſions theſe that are to come; to wit the bad ſenſes & ſpirits of man & other creatures are ordained and reſtituted, and therefore the humours which doe abound, and are enabled to oppoſite cauſes, are fit to be emptied and abayed, whether by bleeding, purging, or otherwiſe, as the learned Phyſitian ſhall adviſe, and as the cauſe of the diſeaſe doth require: ſuch therefore as be diſeaſed, let them not neglect this time.

The

The ordinary infirmities of this season, are Canckers, Wenels, Itch, Scabs, Biles, Boyles, Tertian Fevers, Kings Evill, Jaundyes, bleeding at the nose, paines in the head, pestilent Fevers, and many other diseases of the corruption of the blood.

Infection from the starres may fall,
But one above doth stay them all.

Of Summer.

Summer the third part of our vulgar yeare, according to our usuall computation: now when the Sun hath fully determined the spring with his last Degree of Gemini, and hath moved in his motion to the highest poynt of his course made to the 1. degree of Cancer, which shall be this yeare the 12. of June. Now is the second Solstice of the yeare, called the Solstice of Summer Solstice: for even as the sun when he entreth Cancer, moving, hath his greatest south declination from the Equinoctial line: so now at his ingresse into the beginning of Cancer, he hath his greatest declination toward the north, from the said Equinoctiall line; and even then as at the time of the winter solstice he was so far removed from our vertical point, that he could move no further towards the South, and was therfore to approach again towards our North latitude, at which time he seemeth to stande in noon being come so near to our Zenith that he cannot remove no further towards the north, and is therfore to retorn again to the south latitude. As the first going from us he seemeth also to stand, insomuch that even as before at his return toward us again, he made with us the shortest day and longest night in the yeare: so now at his return from us, he maketh with us contrariwise the longest day and shortest night in the yeare: and afterwards declineth more

and

Though starrs incline to worke us ill,
All shall be as the maker will.

Of Autumne.

Autumn, according to our accustomed Computation, the last quarter of this yeare, beginneth at the Suns departure from the last scripple of Virgo, into the first degree of the second Equinoctial signe Libra, which will be this yeare on the 13 day of September the day and night being of an equall length as in the beginning: at which time is the Autumnal Equinoctial, as then as at the Suns entrance into Aries, the day increasing from the Winter Solstice, till then came to be equall with the night, going on still more and more til the Summer Solstice, when was the longest day and shortest night: so now the night by increasing from the Estivall Solstice, to this the Suns ingredience into Libra, hath got to be equal with the

day

day, and shall encrease more & more, till the Winter Solstice come again, when the night is longest, and the day shortest.

This time of the year is of it self unconstant & tickle, warm in the day time, and cold in the night.

This quarter, because of the inequality of temperature, may as Hypocrates saith, be called the Mother of Sturie of deadly sicknesses: And as Galen saith, that this time of the yeare is very dangerous for dying sicknesses.

The deadly sicknesses, and diseases, commonly attending this time of the yeare, are many, as the stone, paine in the back and kidneys, suppression and impostation of urine, much vomit, cough, and Sciaticaes, and Gouts, many quartane Agues, Falling sickness, Vertigoes, Apoplexies, Lithargies, Palsies, Convulsions, Melancholinesse, Hemorrhoids, obstructions of the spleen, Fistulaes, Tenesmus, Dysenterie, and Dropsie.

Thus every Planet in his kind,
Is to performe the Almightes minde.

A Declaration of the inclination, and disposi-
tions of the winds and weather, according to the di-
verse motions, configurations and influences of the erra-
tical and fixed starres: with the day, houre, and minute
of the change of the Moone, her full, and quarters:
And also the rising and setting of the Sunne, in every
seventh day of every moneth of this present yeare of
our Lord God. 1651.

Of January.

Day.	The Sunrising.	The Sun setteth.
7.	houre. 8. and 3. min.	houre 3. and 57. min.
14	houre. 7. and 56. min.	houre 4. and 4. min.
21.	houre. 7. and 46. min.	houre 4. and 14. min.
28.	houre. 7. and 34. min.	houre 4. and 26. min.
31.	houre. 7. and 23. min.	houre 4. and 37. min.

Last quarter the 5. day 24. min. after 8 of the cloake at night,
dirty and some what windy.

New Moone the 11. day 13. min. after 1 of the clock in the
afternoone, apt for the season.

First quarter the 18. day 29 min. after 11 in the forenoone,
cloudy and cold.

Full Moone the 26. day 6. min. after 4. of the cloake in the
afternoone, reasonably seasonable.

Januaries Abstract.

IN this moneth let not bloud, neither use but little
physick, except great necessity constraines thee, and
beware of taking cold, for in this moneth Rheumes, &
Flegme doe much increase; to fast long is hurtfull, but
a light Supper is the fasting is good & wholsome, use
meates that are naturally hot moderately, and weare
warme cloathes.

In sowing husbandry, this moneth you may set all
kind of common fruit trees, or plants, as Apples,
Pears, Cherris, Filbert, Wallnut, and such like; Ha-
thorne, and all sorts of Quick-sets, or plants are
best to be generally set from the change to the first
quarter.

Take

Take away mosse and superfluous branches from your trees: and this moneth is good to set Beanes, Parsnips, Radish, Leeks, Garlick, Onyons and Daisies, if the weather be mild, and the moone past the full: you may begin to graft at the end of this moneth, as the moone is waxeing in her light.

Good Husbands also this moneth cray their trees, fell Timber, and geld cattell, such as are to be gelded, the state of the moon alwayes considered.

Of February.

Day.	The Sunne rises.	The Sunne sets.
1.	houre 7. and 12. min.	houre 5. and 47. min.
7.	houre 7. and 3. min.	houre 5. and 56. min.
14.	houre 6. and 50. min.	houre 6. and 10. min.
21.	houre 6. and 34. min.	houre 6. and 26. min.
28.	houre 6. and 18. min.	houre 6. and 38. min.

Last quarter the 3. day 19. min. after 11 of the clock in the morning, inclined to moysture.

New Moone the 9. day 37. min. after 8 of the clocke at night, some frost.

First quarter the 17. day 49 min. after 5 of the clock in the morning, frosty and cold.

Full moone the 25. day 9. min. after 9 in the morning, cloudy and unconstant.

Februaries Abstract.

In this moneth all slime ill, with sap rise, and such like, that do applate and stop the Lungs and veines, as thicken the blood, are to be eschewed as enemies to health, and also get for beare Apothecs, and letting of blood, except necessity do urge, & learned counsell bee abvile you: beware now of taking cold, for now are Agues apt to be taken, & if in hery ill so, take heate and afterward suffer cold upon them.

Now is the most apt time to graft or plant, and to set all kind of trees and bushes, the mind & weather and age of the moon considered, Beanes, Peasen, Turnips, Onyons, Parsnipp, and such like, as in Ian-

may

may very fitly be set in the wane of the moon.

The time is now to trim up Gardens, to set & sow all kind of Kitchin herbs, to set Hops, sow Kernels, mustard-seed, oats, set hops, cut vines and prune them, stick up your runnet-wall Peafe and Hastings.

Of March.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 6. and 20. min.	houre 5. and 40. min.
7.	houre 6. and 8. min.	houre 5. and 52. min.
14.	houre 5. and 41. min.	houre 6. and 56. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 22. min.	houre 6. and 38. min.

Last quarter the 4. day about 5. of the clock at night, seasonable and temperate.

New moon the 11 day 25 min. after 10 of the clock in the morning, windy and frosty.

First quarter the 19 day, 8. min. after 1. of the clocke in the morning, some fall of moysture.

Full moone the 26 day 27 min. after 11 of the clocke at night, faire and frosty.

Marches Abstract.

IN this moneth the humours of mans body begin to increase, & now grosse feeding breedeth grosse blood, & grosse humours, & therfore use meats of good digestion, & such as breed good iuyce: it is good time to purge & clarifie the blood by potions, bathings, and bloud-letting, or such other ways as the learned Physitian shal appoynt, & as the cause of the disease shall require: use sweetmeats and drinks are commendable.

The time of grafting as yet endureth, together with ferring, sowing, pruning, planting of vines, and Peas, Fullow, oates, peafe, onyons, parsnips, and such like.

Of Aprill.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 5. and 18 min.	houre 6. and 42. min.
7.	houre 5. and 6. min.	houre 6. and 54. min.
14.	houre 4. and 54. min.	houre 7. and 6. min.
21.	houre 4. and 39. min.	houre 7. and 21. min.
28.	houre 4. and 29. min.	houre 7. and 31. min.

Last quarter the 2 day 23. min. after 13. of the clocke at night, some overcaging clouds for raine.

New moone the 9 day 12 min. after 11 of the clocke at night, some Aprill showers.

First quarter the 17 day 50 min. after 7 of the clock at night, answerable to the season.

Full moone the 25 day about 11 of the clocke in the forenoone, inclined to moysture.

Aprill Abstract.

IN this moneth of Aprill, the pooures of mans body are opened, and apt to receive Physick, and they that refuse the same, I commit them to the benefit of nature, for of all times of the yeare, this is the best time to prevent causes of sickness; or for speedy remedy in extremities, for now nature doth renew strength through all the body: so where sickness hapneth the sooner unburdneth by means of Physick, wherefore what is cannot doe now, will hardly be done hereafter, therefore take time while time is, &c.

As yet you may graft and proyne vines, and also set melons, citrons, cowcumbers, artichoakes, and pole-hops, sow barly, Tanners apply themselves to barking of trees.

Of May.

Day.	The Sun riseth.	The Sun setteth.
1.	houre. 4. and 23. min.	houre 7. and 37. min.
7.	houre. 4. and 15. min.	houre 7. and 45. min.
14.	houre 4. and 5. min.	houre 7. and 55. min.
21.	houre 3. and 56. min.	houre 8. and 4. min.
28.	houre 3. and 50. min.	houre 8. and 10. min.

Last quarter the 2. day, 52. min. after 4. of the clocke in the morning, faire weather.

New Moone the 9 day, about 11. of the clocke in the forenoone, some clouds with wind.

First quarter the 17 day, about 1 of the clock in the afternoone, fitting the season.

Full

Full moone the 24 day, about 8 of the clock at night, overcasting clouds for raigne.

Last quarter the 31. day, 49. min. after 10. of the clock in the forenoone, some heate drops.

Mayes Abstract.

Let this moneth rise early, for May doth not love any sluggards, and let such as bee in health and able walke into the fields, and eate and drinke betimes for it is good and holesome, abstaine from all meates that be of a hot nature: and such as be sick, it is a very good time of the yeare to let blood, or to take Physick: such as bee whole, God keepe them in health, and such as bee sick, God send them good Physitians and Physick.

The time is now fitting to sow Bazill, Marjerom and such fine seedes as before might not be sowne, because of the coldnesse of the weather. Set Sage according to the proverbe, set sage in May and it will last alway, sow flax and hemp, set Artichokes, weede your Hops, and Gardens, tie to your grapes that no superfluous branches trouble them. May dew, Rosemary flowers, and beane flowers, may at your pleasure be distilled this moneth, and now also have a care of watching your bees.

Of June.

Day.	*The Sun riseth.*	*The Sun setteth.*
1.	houre 3. and 49 min.	houre 8. and 11. min.
7.	houre 3. and 46 min.	houre 8. and 14. min.
14.	houre 3. and 47 min.	houre 8. and 13. min.
21.	houre 3. and 49 min.	houre 8. and 11. min.
28.	houre 3. and 52 min.	houre 8. and 8. min.

New moon the 8. day 17 min. before 1. of the clocke in the morning, some overcasting clouds.

First quarter the 16. day, 5 min. after 4 of the clocke in the morning, somewhat windy and unconstant.

Full moone the 23. day, 20. min. after 3 of the clocke in the morning, some windy moysture.

Last quarter the 29. day, 34. min. after 6. of the clocke in the afternoone, fitting the season.

Junes Abstract.

In this moneth, if thou must needs use Physick take it early in the morning, that it may have wrought before the heate of the day, and use a light and thin diet, for the stomack is not able to digest as in winter, or in some of the former moneths, and it is very good and convenient for some to drinke clarified whay, boyled with cold hearbs, and to abstaine from violent exercise.

Distilling of roses, making of syrups and conserves, are now in prime, now gather such herbs as you meane to keepe all the yeare, but be sure you dry them in the shade: good husbands and housewives are now weeding their corne and gardens, & others shearing their sheepe, the time serves to set rosemary & gillyflowers, take heede of cutting hearbs or trees or herbs with knife, but rather gather them with your fingers, now you may set saffron, carry out compost, make hay, rid gardens of snayles, ants, or pismires, &c.

Of July.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 3. and 54. min.	houre 8. and 6. min.
7.	houre 3. and 59. min.	houre 8. and 1. min.
14.	houre 4. and 7. min.	houre 7. and 53. min.
21.	houre 4. and 20. min.	houre 7. and 40. min.
28.	houre 4. and 30. min.	houre 7. and 30. min.

New moone the 7. day, 16. min. after 3. of the clocke in the afternoone, sultery hot weather.

First quarter the. 15 day 33. min. after 4. of the clock in the afternoone, faire and pleasant.

Full Moone the 22. day, 15. min. after 10. of the clock in the forenoone, somewhat moyst weather.

Last quarter the 29 day about 5 of the clocke in the morning, apt for the season.

Julies Abstract.

In this moneth use cold hearbs & meates, abstaine from physick, and now the rivers are more wholsome then the baths, let the sun be up before you walke abroad, in the time of any pestilence or plague, keepe your chamber windowes shut opening them when the sun hath force of shining, and be sure to perfume your chambers every morning with tarre upon a chafingdish of coales, then which nothing is better

better, and ust Cardus Benedictus, boyled and drunke fasting.

Hay haveſt now calles slack husbandis to worke, and ſuch as have leasure, it is good to follow for wheate, & to carry out dyle, & to gather seedes & flowers to keepe all the yeare, and to dry them in the shade, till they be almost dry and then set them a while in the sun, & in like manner you may ute your herbs.

Of August.

Day.	The sun riseth.	The sun setteth.
1.	houre 4. and 36. min.	houre 7. and 24. min.
7.	houre 4. and 48. min.	houre 7. and 12. min.
14.	houre 5. and 0. min.	houre 7. and 0. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 27. min.	houre 6. and 33. min.

New moone the 6. day, 36. min. after 6. of the clocke in the morning, faire weather.

First quarter the 14. day 48. min. after 2 of the clock in the morning, hot and faire weather.

Full moone the 20 day, 39 min. after 5. of the clocke in the afternoone, some overcasting clouds

Last quarter the 27. day, 35. min. after 6. of the clock in the afternoone, inclined to raine.

Augusts Abstract.

In August, moderate dyet is good Physick, for now it is dangerous to surfit, and take heede of heates and theirs of colds, for nothing sooner ingendereth Feuerfies, and ute not to sleep much, especially in the afternoone, for making opilations and for avoyding of Agues and headach & Catharres, and now let a man abstaine from physicke except neceſsity doe compell.

Now Lady Ceres lookes to have men enough to attend her, they that would have good seedes for their gardens the next yeere, must now gather of their owne, least in buying they loose their labour and their money, and such as desire to have lettice, or other herbs for winter, may sow seedes in the increase of the moone.

Of September.

Day	The Sun riseth.	The Sun setteth.
1.	houre. 5. and 34. min.	houre 6. and 26. min.
7.	houre. 5. and 46. min.	houre 6. and 14. min.
14.	houre. 6. and 2. min.	houre 5. and 58. min.
21.	houre. 6. and 14 min.	houre 5. and 46. min.
28.	houre. 6. and 28. min.	houre 5. and 32. min.

New

New Moon the 4. day, 21 minutes after 10. of the clocke at night, fitting the season.

First quarter the 12. day, 8 min. after 11. of the clocke in the forenoone, faire weather.

Full Moon the 19. day, 47 min. after 2 of the clocke in the morning, moyst and unconstant.

Last quarter the 26 day 32. min. after 11 of the clocke in the forenoone, some raynie showers.

Septembers Abstract.

IN this moneth such as have need, may safely take physick, also may bath and bleede, in this moneth all things are in their proper nature and vertue, and such fruits as are ripe and not infected, are good to eate for such as have good stomacks: Time is good to make conserve of Barbaries, and Quinces, winter hearbs may now be sowne, likewise is the time to set Artichokes, Rose trees, Aple trees, Wardens, Strawberries, violets gilliflowers; Apples are to be gathered in the full of the moone, sow Parsenips, and in dry weather gather your Hops; Good husbandry is sowing Rye and Wheate, good huswifery is making of Verjuce, and plucking of Hempe.

Of October.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 6. and 34. min.	houre 5. and 26. min.
7.	houre 6. and 46. min.	houre 5. and 14. min.
14.	houre 7. and 0. min.	houre 5. and 0. min.
21.	houre 7. and 15. min.	houre 4. and 45. min.
28.	houre 7. and 26. min.	houre 4 and 34. min.

New Moone the 4. day 53. min. after 1. of the clock in the afternoone, windy and unconstant.

First quarter the 11. day 22. min. after 6. of the clock at night, windy weather.

Full moone the 18. day, 9. min. after 2. of the clock in the afternoone, cloudy weather.

Last quarter the 26. day. 30. min. after 7. of the clocke in the morning, fitting the season.

Octobers Abstract.

IN this moneth thou mayest take Physicke and also bath if occasion serve, use hot meates and drinkes, and use good wholsome wines to nourish good blood, and beware of ta-

king

king cold, because the quartaine Ague will be apt to be taken, and such other dangerous and ill diseases.

Remove young trees, as apples, pears, plumbs, quinces, &c. set peare parsnips, &c. good husbanks needs not be limited to sowing of wheat, set nuts, acorns, and Filberts, and doing of such good husbandry.

Of November.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 7. and 33. min.	houre 4. and 27. min.
8.	houre 7. and 42. min.	houre 4. and 18. min.
14.	houre 7. and 52. min.	houre 4. and 8. min.
21.	houre 8. and 3. min.	houre 3. and 57. min.
28.	houre 8. and 9. min.	houre 3. and 51. min.

New moon the 3 day, 24. min. after 4. of the clocke in the morning, winterly weather.

First quarter the 10. day, 45. min. after 1. of the clocke in the morning, some fall of moysture.

Full moone the 17 day, 20 min. after 4. of the clocke in the morning, frosty and cold.

Last quarter the 25 day, 32. min. after 5 of the clock in the morning, winterly weather.

Novembers Abstract.

1St November finish the physick you meane to take, & so rest till March, except some great necessity doe constraine you. Use good meate, and holsome wine to nourish thy blood, provide thee warme cloathing and goe dry of thy feet, or else be sure to be troubled with Rheume and Mose, besides some other inconvenience that will ensue. Beware of the Hot-house this moneth, and use Betony and Cinamon in drink.

In the new of the Moone, you may remove young trees, as the last moneth, and set Crabtree stockes to graft on, when you please, it is good time in the wane of the moone to set peare, and beanes, and if the weather be not hard, it is good sowing of Parsenips, good malting of male, and killing of Beeves & Swine.

Of

Of December.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 8. and 12. min.	houre 3. and 48. min.
